

Curriculum Visions Unique Topic Song

So many creatures

[Verse]

Why do the fishes swim so deep
Why do the lions roar in sleep
Why do the birds fly so high
So free
Every creature's got a place to be

[Chorus]

Oh so many creatures under the sun
Each one special
Each one fun
They live where they fit
They know their way
Different homes
Different rules every day

[Verse 2]

Polar bears need the icy snow
Cactus plants in deserts grow
Frogs like ponds
Bees buzz in trees
Every one has their own need
You see

[Bridge]

If they mixed and matched
What a mess
Some would be lost
In all the stress
So they stick to their kind
They know it's right
To keep their homes shining bright

[Chorus]

Oh so many creatures under the sun
Each one special
Each one fun
They live where they fit
They know their way
Different homes
Different rules every day

[Outro]

So let's explore but let them be
Respect the world
The land

The sea
Living things are varied
And that's okay
That's what makes the world this way
