

Curriculum Visions Unique Topic Song Lyrics

Seeds journey

From the dirt a whisper breaks the ground
A tiny seed where hope is found
Roots dive deep searching for the stream
A quiet life starts to dream

[Verse 2]

The shoot it climbs toward the light
Stretching tall through day and night
Leaves unfold like open hands
Reaching wide to understand

[Chorus]

Oh the cycle turns and the story grows
A dance of life that nobody knows
From the seed to the sky then back below
This is how the garden shows

[Verse 3]

Branches twist like a painter's stroke
In the sun the blossoms spoke
Colours bloom and petals fall
Nature's rhythm answering the call

[Bridge]

Buds to flowers seeds take flight
Carried on the wind through day and night
Scattered wide on the earth they land
A new beginning in the sand

[Chorus]

Oh the cycle turns and the story grows
A dance of life that nobody knows
From the seed to the sky then back below
This is how the garden shows
