Science

Book: Habitats (4B)

Pages 4-11

Everything here is based on our Curriculum Visions book Habitats (4B).

In this segment, we are going to think about living things.

You will need to go to pages 4-5 of the book.

Part 1

What are the seven things that living things can do, that non-living things can't?

Answers.....

Take in food to make energy, give off waste, grow, move, be affected by change in the environment, change over time, make new living things.

Go to pages 6-7. What are the building blocks of all living things? How can some living things grow in different ways?

Answers.....

Cells. The different cells can do different things / form different parts of the body

Go to pages 8-9 What is a habitat? Do all plants and animals live in the same kind of habitat? Why or why not?

Answers.....

A place where something lives or is best suited to live.
No, because each living thing needs different types of food, shelter, etc.

Go to pages 10-11

Why don't bees and wood lice live in the same places?

Answer.....
Because they need different types of food, shelter, etc in order to live.

How can you tell what kind of habitat an organism lives in?

Answer.....
By looking to see where you find it and where you don't.
