

# Many kinds of plants

Plants come in lots of shapes and sizes.

The world has lots of plants.

They are not all the same.

Some grow on land.

Some grow in water.

Some grow on other plants.

Some have prickles.

Some even eat insects!

Moss has lots of tiny leaves.

A mushroom looks like a hat.

This ivy is a climbing plant.

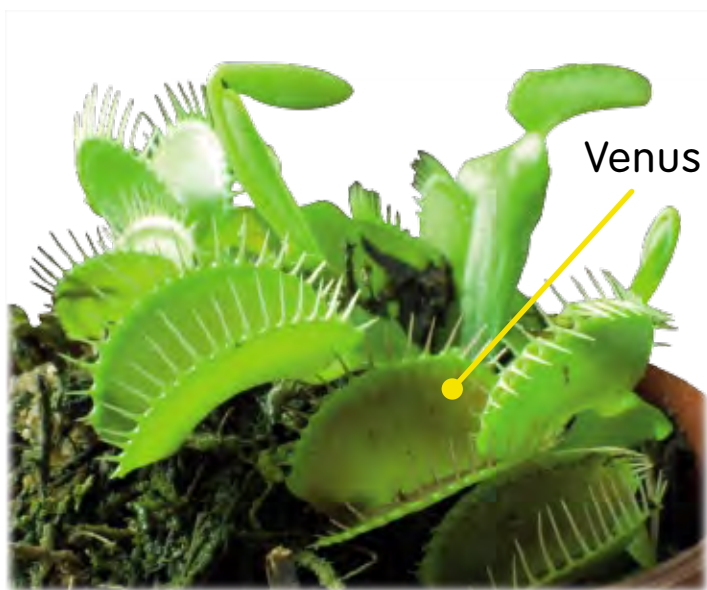

A dandelion grows in fields. It has yellow flowers.

A tree is the biggest kind of plant. It has thick branches.

This plant eats flies.  
It is called a Venus fly trap.

A cactus has sharp prickles.

**What plants can you see from your window?**
