

Dawn and dusk

Dawn and dusk are at the ends of the day.

Dawn is the time of day when it starts to get light.

Dawn is just before sunrise.

The dawn sky often has pale colours.

Dusk is the time of day when it starts to get dark.

Dusk is just after sunset.

The light gets less and less at dusk.

1

Late afternoon

2

Sunset

How the light changes as the Sun sets.

At dawn the sky is dark blue above, and pink on the horizon.

3

Early dusk

4

Late dusk

Is dusk in the morning or the evening?
