

High and low

Sounds can be high or low.

Some sounds are like squeaks.
These are high sounds.

Some sounds are like roars.
These are low sounds.

If you squeeze a toy,
like a rubber duck, it will
make a high sound.

A whistle makes a high
sound when you blow it.

If you pluck the thin strings of a guitar you will get a high note.

A lion makes a low sound when it roars.

A triangle makes a high sound. It goes "ting" when you hit it.

**You make a high sound when you say "ping".
What sound do you make when you say "pong"?**
