

# Animal groups

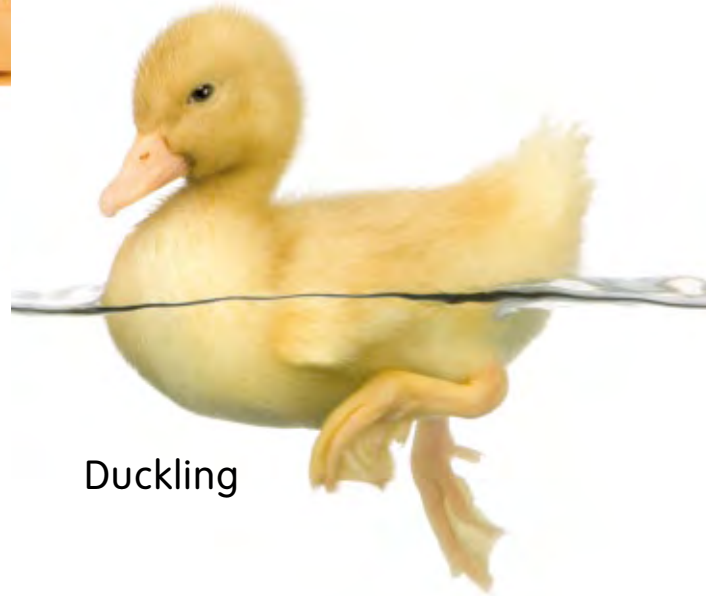

**Animals are not all different.**

Animals may look very different, but they still have many things in common. That is why they can be put into groups.

Some animals have big ears so they could be put in a 'big ear' group. Some have beaks so they could be put in a 'beak' group. Some animals don't have any legs so they could be put in a 'no leg' group.

Calf

Duckling

Ladybird

Lamb

Worm

Caterpillar

Beetle

Butterfly

Starling

**What other animals could you put in these groups?**
