

# Flowers and leaves

We can usually tell plants apart by their flowers. We can sometimes tell plants apart by their leaves.

Here are some examples of different flowers.

Daffodils have yellow petals. They make a trumpet shape.

Bluebells have blue petals. Each flower is shaped like a bell.

Daisies have white open flowers with a yellow centre.

Daffodils

Bluebells

Daisies

Dandelions

Here are some examples of different leaves.

Daffodils have long, narrow leaves.

Dandelions have broad leaves.

**In how many ways are these flowers different from one another?**
