Based on pages 18 and 19 of *Food, teeth and eating*

Testing drinks

Try this...

1. Set up a number of beakers on your table.
2. Pour a different liquid into each beaker. Make sure you pour the same amount into each beaker.
3. Put a label on each beaker to show what drink is in the beaker.
4. Place an eggshell in a string sling and put it in a beaker as the diagram shows.

5. Put eggshells in the other beakers. Try to use the same size eggshell in each beaker.
6. Leave the beakers for a few days.
7. Look at the eggshells in each beaker.
8. Write down your observations.

Looking at the results.

9. What did your results show?
