

Name: Form:

Based on pages 6 and 7 of *Properties of materials*

Testing floor coverings

Try this...

1. Write down what you will use in your test.

2. Write down how you will make your test.

3. Write down your prediction for the order of hardness starting with the hardest.

4. Write down the reason for your prediction.

5. Make a table for your results on a separate piece of paper and then make your tests.

6. Write down the order of hardness starting with the hardest.
