Hard and soft rocks

Some rocks are much harder than others. This affects how they are used.

Q1. Write an A on the hard rock and a B on the soft rock.

Q2. How can you tell that one rock is softer than the other?

Q3. What is the name of rock made from mud?

Q4. What holds grains of sand together to make a rock?

Q5. What is limestone made from?

Q6. What is marble?
