# Looking at living things

## Try this...

1. Have a look around the outside of your school for the living things listed below. Take this sheet and fill in the table as you walk around. Put a dash if you cannot find them in any place.
2. If you find living things in other places add them to the table. There are three blank rows that you can use.
3. If you find some other living thing you would like to record, write its name in a blank box in column 1, then put a tick in the appropriate location.

Living thing	Place found							
	Wall	Path	Edge of path	Lawn	Flower bed			
Lichen								
Moss								
Fern								
Grass								
Snail								
Slug								
Earthworm								
Woodlouse								
Spider								
Beetle								
Butterfly								
Fly								
Bee								

## Looking at the results.

4. In which place did you find the most living things? ..... 
5. Which living thing was found in the largest number of places? .....
