Based on pages 12 and 13 of *Habitats*

# Identifying soil life

Try this...

1. Look at this animal key and make sure you know how it works.

2. Use the key to identify some of the animals that you find in the soil.

3. For each soil sample that you examine, count the number of animals that you identify. Record your results on a separate sheet.

**Looking at the results.**

4. Which animals were most numerous?

5. Which animals were present only in very small numbers?
