

Improving the environment for living things

We can turn waste ground into places where many species can thrive by making country parks.

Q1. The diagram shows a country park with three kinds of lakes labelled A, B and C.

(i) Identify each type of lake.

A 

B 

C 

(ii) Which lake has the most varied wildlife?

Q2. Name three locations of wasteland in a town or in the countryside.

Q3. What are most country parks built on? 

Q4. Why does there need to be a variety of habitats in a country park?

Q5. When a lake is dug out, what other feature can be made in the country park?

Q6. How can paths in a country park help shy creatures?
