Eating, growing, moving and changing

All living things need food for energy so they can carry on growing, moving and changing.

Q1. The picture above shows a very simple living thing. Draw how it reproduces.

Q2. What do green plants use to make food?

Q3. Where do animals get their food?

Q4. What happens when you touch the leaves of a sensitive plant?

Q5. What are all living things made of? 

Q6. Living things evolve. What does evolve mean?
