## Finding out where plants live

A habitat is the place where a living thing is best suited to live, and where it finds shelter, food and others of its own kind. Even in a small area there will be many habitats.

A

B

C

D

E

**Q1.** (i) Name the plants labelled A to E in the three habitats.

A ..... B ..... C .....

D ..... E .....

(ii) Shade in the shady habitat.

**Q2.** What is a habitat in which trees are found? .....
