

# Word Match: Friction

## Curriculum Visions

Match the word to the definitions by drawing a line from one to the other.

air resistance

aquaplaning

avalanche

evaporate

force

forcemetre

friction

newton

streamlining

tread

water resistance

weight

A measure of the force with which an object is attracted to the Earth by gravity

The amount that water pushes back against something moving through it

An instrument for measuring force

Making something a sleek shape so that it moves more easily through air or water

A push or a pull

The rapid movement of snow down a mountainside

The amount that air pushes back when something moves through it

The pattern on a object that helps it to grip the surface

When a liquid turns to a gas

A force that works against any movement

The measurement used for force

Uncontrolled gliding of tyres on a wet surface

# Word Match: Friction

Curriculum Visions

Match the word to the definitions by drawing a line from one to the other.

air resistance	A measure of the force with which an object is attracted to the Earth by gravity
aquaplaning	The amount that water pushes back against something moving through it
avalanche	An instrument for measuring force
evaporate	Making something a sleek shape so that it moves more easily through air or water
force	A push or a pull
forcemetre	The rapid movement of snow down a mountainside
friction	The amount that air pushes back when something moves through it
newton	The pattern on a object that helps it to grip the surface
streamlining	When a liquid turns to a gas
tread	A force that works against any movement
water resistance	The measurement used for force
weight	Uncontrolled gliding of tyres on a wet surface
