Based on pages 4 and 5 of *Simple electricity*

# Battery power

Try this...

1. Look at some batteries and draw each one in the space below.

2. Look at a selection of objects that use batteries for power. Write the name of each object in the left hand column of the table below.

3. Think about what the batteries are used for in each object and put a tick in the appropriate column or columns.

Object	Use of power		
	light	movement	sound

Looking at the results.

4. What is the power in batteries most often used for?

.....
