

# Word Match: Simple Electricity

## Curriculum Visions

Match the word to the definitions by drawing a line from one to the other.

appliance  
battery  
bulb  
circuit  
component  
conductor  
insulator  
mains electricity  
power  
series circuit  
water terminal  
voltage  
switch

A material that does not allow electricity to flow through it  
The electric supply delivered by the electric company  
The two ends of a battery  
An ordinary light  
A large piece of equipment that uses electricity  
A path or loop for electricity  
The electrical pressure that a battery or mains can provide  
The amount of electricity needed to do something  
A component for breaking the flow of electricity in a circuit  
Something that changes chemicals into electricity  
A material that allows electricity to flow through it  
A part of a circuit that uses or controls electricity  
An electrical circuit in which a battery and one or more components are connected in a single loop
