

Name: Form:

Based on pages 14 and 15 of *Gases around us*

Gas bubbles

Try this...

1. Fill a jar with water.
2. Put four level teaspoons of bicarbonate of soda into the water and stir well.
3. Put four teaspoons of vinegar into the water, then add four currants. Stir the water well.
4. Look into the liquid and write down what you see happening.

.....

.....

.....

5. Watch the liquid for the next ten minutes. Write down any changes that occur.

.....

.....

.....

Looking at the result.

6. Explain what happened to the currants.
