

Name: Form:

Based on pages 14 and 15 of *Changing from solids to liquids to gases*

Investigating evaporation

Try this...

1. Pour cold water into a dish until it just covers the bottom.
2. Pour cold cooking oil into a dish until it just covers the bottom.
3. Put the dishes side by side in a warm place.
4. Write down how often you will examine them. 
5. Examine the dishes regularly.

6. What is the purpose of putting the dishes in a warm place?

.....

.....

7. Predict what you think will happen.

.....

8. Explain your prediction.

.....

.....

.....

9. Write down what you observe over a period of time.

.....

.....

Looking at the results.

10. How accurate was your prediction?

.....
