

Name: Form:

Based on pages 18 and 19 of *Changing from solids to liquids to gases*

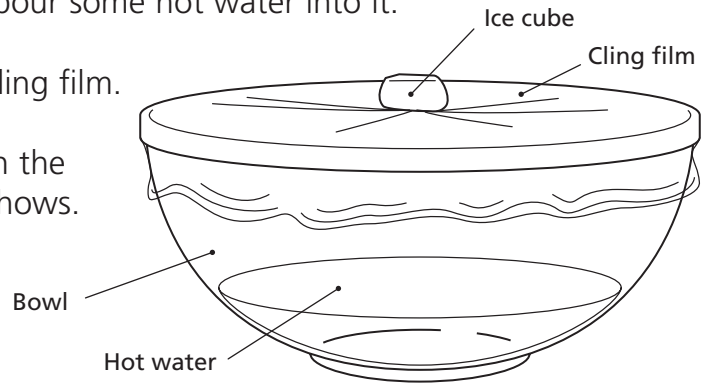

Investigating condensation

Try this...

1. Set up a container on your desk and pour some hot water into it.

2. Cover the top of the container with cling film.

3. Ask your teacher to put an ice cube in the middle of the cling film as the diagram shows.

4. Watch the cling film for a few minutes and write down what you see.

.....

.....

5. Look at the cling film again every ten minutes during the next half an hour and write down what you see.

.....

.....

.....

.....

.....

.....

Looking at the results.

6. Explain what you have seen.

.....

.....
