Based on pages 20 and 21 of *Microbes*

Can temperature affect the activity of yeast?

Try this...

1. Think back to when you observed yeast in Unit 7. How did you set up the bottles of feeding yeast?

2. How could you adapt the experiment you did in Unit 7 to investigate how temperature affects feeding yeast? Write out a plan and draw a table on a separate piece of paper in which to record your results.

3. Show your plan to your teacher. If your teacher approves, try it.

Looking at the results.

4. What did the results show?
