See pages 22 and 23 of *Microbes*

Are microbes good or bad?

There are far more good microbes than bad ones, so we need to encourage the good ones and keep out the bad ones.

Q1. Three microbes are shown in the diagram. Which one is:

(i) A bacterium? (ii) A fungus?

Q2. What would happen to us if all the microbes on Earth were destroyed?

.....

Q3. What kind of microbe is used to make yoghurt?

Q4. How does a fungus called *Arbuscular* help crops?

.....

Q5. Which microbes are always harmful?

Q6. (i) What are the special chemicals that bacteria produce?

.....

(ii) Name two uses for these special chemicals.

.....
