Microbes make food

Microbes need to eat, and they eat the same food as us. This can be good news.

Q1. Here are four yeast cells. Draw in some more cells to show how the group may look a little later when reproduction has taken place.

Q2. (i) What is leavened bread?

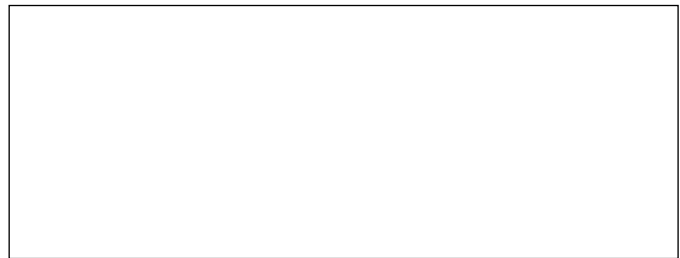

.....

.....

(ii) Name an unleavened bread.

.....

(iii) In the box draw a small ball of dough. Then draw what you think the ball of dough might look like after cooking if it contained yeast.

Q3. What happens when yeast is added to dough?

.....

Q4. What two substances are formed when milk is curdled?

.....

Q5. What is the microbe that makes the blue veins in some kinds of cheese?

.....

Q6. (i) Name a drink that is pasteurised.

(ii) What happens to this drink when it is pasteurised?

.....

.....
