Based on pages 14 and 15 of *Dissolving*

Warming a fizzy drink

Try this...

1. Pour warm water into one bowl and cold water into the other.
2. Pour some fizzy drink into two small beakers.
3. Put one beaker in the bowl of warm water and the other in the bowl of cold water.

4. Look in each beaker and observe the bubbles for a few minutes.
5. Write down your observations here.

Looking at the results.

6. Explain your observations.
