

Name: Form:

Based on pages 20 and 21 of *Dissolving*

Which liquids have something dissolved in them?

Try this...

1. Look at the liquids labelled A to F. Predict which ones have something dissolved in them and which ones you think are pure.
2. On the back of this sheet, make a table with three columns and six rows. The headings for the columns are 'Liquid', 'Prediction' and 'Result'. The rows should be labelled A to F.
3. Fill in the first two columns of the table for each liquid.
4. Write down your plan to find out which liquids have something dissolved in them.

.....

.....

.....

.....

5. Explain why the plan will work.

.....

.....

.....

.....

6. Let your teacher check your work before you try your investigation.
7. Carry out your investigation and fill in the table.

Looking at the results.

8. How accurate were your predictions?
