

CurriculumVisions Lesson

Students: fill in next to the word answer and return the document for assessment.

Science

Book: Changing from solids, to liquids to gases (5D)

Pages 14-19

Everything here is based on our Curriculum Visions book **Changing from solids, to liquids to gases (5D)**

In this segment, we are going to learn more about how substances change from liquids to gases and back again.

Part 1

You will need to go to pages 14-15 of the book. Think about a puddle evaporating on a hot day. What is happening to the particles of water in the puddle?

Answer.....

Part 2

Go to pages 16-17. Why is it safer to boil water in a rough pan that is only half full?

Answer.....

Part 3

Go to pages 18-19. Draw a picture of condensation in the side of the glass and label it to show where the water is coming from.

Answer.....

Why does more condensation form when the glass is colder than the air?

Answer.....
